

# PROTEX

Central Heating System Additives

## INHIBITED INHIBITOR FOR CENTRAL HEATING SYSTEMS

### DIRECTIONS FOR USE

1. Shake well before use.
2. Turn off the boiler.
3. Use after the system has been flushed through with either Protex De-Scaler or Protex Universal Cleanser.
4. Add Protex Inhibitor directly into the expansion vessel or header tank as the system is being filled.  
If being added to an existing system, first drain off at least 6 litres of water.
5. Refill the system and turn on the boiler pump so that the mixture becomes evenly distributed through the radiator system.
6. Complete system treatment label and attach to filling point.
7. Use the self adhesive label to register date of application.

Protex Inhibitor has been added to the water in this central heating system to provide corrosion protection. To ensure continued protection, re-dose the system if the water is drained for any reason.
